---

Kevin,

We have an additional comment on the Quarterly Groundwater Monitoring Data Report Third Quarter 2013 (November 25, 2013). In Figures 10, 11, 12, 13, and 14, the gray “Approximate Boundary of Dairy Facilities” line is indistinct. All of the figures in the Report must clearly show this line (the same line shown in black in Figure 4 is OK).

Eric
